PROFESSIONAL SUMMARY

Customer-facing AI implementation and solutions professional translating business requirements into CRM, automation, web, and AI-enabled workflows. Hands-on across discovery, configuration, testing, launch, training, troubleshooting, and support. Brings 8+ years of consultative customer experience plus technical delivery using GoHighLevel, REST APIs, webhooks, Twilio, Supabase, and Vercel.

CORE SKILLS

Implementation & Onboarding: Requirements gathering, solution configuration, implementation planning, workflow mapping, UAT/testing, launch support, customer training, documentation, stakeholder communication

CRM & Automation: GoHighLevel, HubSpot, Salesforce, CRM pipelines, lead routing, appointment workflows, reminders, follow-up automation, review workflows

Technical: REST APIs, webhooks, SQL, Python, JavaScript, HTML/CSS, Supabase/Postgres, Vercel serverless functions, Git/GitHub, troubleshooting, Jira, Twilio

PROFESSIONAL EXPERIENCE

Principal Consultant — CRM, Automation & Implementation, 2020 – Present

Blair Digital Studios | Remote

- Gather requirements through discovery and workflow audits, translating operational pain points into CRM, automation, web, and AI-enabled implementation plans.
- Configure reusable client workflows including a 12-stage GoHighLevel CRM pipeline, tagged lead routing, missed-call text-back, appointment reminders, no-show recovery, review requests, and follow-up sequences.
- Build and test prospect-specific implementations, including five Fountain Hills demo websites and a revenue workflow with a two-way AI receptionist, test form, and 13-step customer journey.
- Own implementation delivery from scope through configuration, integration, testing, launch, documentation, customer training, and post-launch troubleshooting using GoHighLevel, Twilio, REST APIs, and webhooks.

Online Experience Advisor, Jul 2026 – Sep 2026

DriveTime | Tempe, AZ

- Guided customers through digital vehicle, financing, documentation, and account workflows with clear expectations and next steps.
- Resolved account issues, documented cases in CRM systems, and coordinated escalations across technical and operational support teams.
- Coordinated cross-functional handoffs and escalations to keep customer cases moving through operational and technical dependencies.
- Translated complex financing, product, and transaction requirements into clear customer guidance in a high-volume, compliance-sensitive environment.

Sales Representative, Sep 2017 – 2025

A Better Way Wholesale Autos | Naugatuck, CT

- Managed a high-volume customer pipeline, coordinating financing, service, documentation, and operations across multi-step transactions.
- Maintained structured CRM follow-up, customer records, and cross-functional handoffs while building repeat and referral business.
- Coordinated customer requirements across sales, finance, service, and operations to support accurate documentation and timely transaction completion.
- Delivered product walkthroughs, clarified requirements, resolved objections, and kept customers informed through the transaction lifecycle.

SELECTED TECHNICAL PROJECT

VYBE — AI Passenger Experience Platform

vybe-app-blue.vercel.app

- Designed and deployed a voice concierge using ElevenLabs speech services, context-aware responses, and Vercel serverless functions.
- Tested end-to-end authentication, data, voice, and recommendation flows and resolved deployment issues across the production environment.
- Implemented Supabase authentication/data flows, server-side credentials, and Google Places/Routes integrations.

ADDITIONAL SELECTED BUILDS

Two Pearls Travel Company — Luxury Travel Website (Live in Production)

two-pearls-travel.vercel.app

- Designed and launched a live luxury travel company website, deployed to production on Vercel.
- Connected a live Stripe account for payments.

Blair OS — Custom CRM Platform (Own Product Build)

- Built a custom CRM platform to run Blair Digital Studios' sales pipeline, replacing GoHighLevel.
- Migrated 249 lead records from GoHighLevel into Blair OS with zero failed records, organized into Blair OS's own 10-stage sales pipeline.

Blair Digital Studios — Demo Websites (Demo / Pitch Sites — Not Paid Client Work)

- Designed and deployed five demo websites for Fountain Hills, AZ businesses (dental, chiropractic, physical therapy, and salon), built as sales demonstration / pitch sites — not paid client engagements.
- Published a live portfolio hub collecting the demo sites.

Blair Digital Studios — Live Site & AI Systems

- Maintain the live Blair Digital Studios website and its AI receptionist / voice demo systems.
- Ran a verified outreach operation of 47 outreach emails, each paired with an individualized one-page business audit.
