

EMMANUEL NANADOUM

SALES ENGINEER | SOLUTIONS CONSULTANT | AI, CRM & AUTOMATION

Phoenix, AZ | 602-810-1271 | nanadoun81@gmail.com | linkedin.com/in/emmanuel-nanadoun-7971b7a8 | Remote

PROFESSIONAL SUMMARY

Customer-facing technical and sales professional with 8+ years of consultative selling and 4+ years designing CRM, automation, web, and AI-enabled solutions. Experienced leading discovery, translating business pain points into technical requirements, building solution demonstrations, explaining integrations and tradeoffs, and guiding customers from evaluation through implementation. Bridges business and technical audiences through presentations, workflow diagrams, proposals, demos, and stakeholder discussions.

CORE EXPERTISE

Pre-Sales & Customer Discovery

Consultative discovery • Needs analysis • Solution mapping • Technical demos • Objection handling • Value articulation • Proposal support

Technical Foundations

REST APIs • Webhooks • SQL • Python • HTML/CSS/JavaScript • Supabase • AWS fundamentals • Technical troubleshooting

Solution Design & Communication

Workflow diagrams • Solution architecture • Presentations • Technical documentation • Implementation plans • Stakeholder communication

Platforms & Delivery Tools

GoHighLevel • HubSpot • Salesforce • Jira • Twilio • Git/GitHub • CRM automation • AI voice/workflow tools

PROFESSIONAL EXPERIENCE

Principal Consultant - CRM, AI Automation & Technical Solutions | Blair Digital Studios | Remote

2020 - Present

- Lead customer discovery and requirements conversations, identify operational pain points, and map business goals to practical CRM, automation, web, and AI-enabled solutions.
- Build and present proof-of-concept solutions and demonstrations using GoHighLevel, Twilio voice/SMS, AI voice workflows, REST APIs, webhooks, Supabase, and modern web tools.
- Translate technical capabilities into customer-facing value through solution diagrams, scopes, proposals, implementation plans, presentations, and clear explanations of integrations and tradeoffs.
- Own the handoff from solution design into configuration, testing, launch, training, troubleshooting, and post-launch optimization while coordinating technical and non-technical stakeholders.

Online Experience Advisor | DriveTime Automotive | Tempe, AZ

Jul 2026 - Sep 2026

- Guided customers through complex digital vehicle, financing, and documentation workflows using consultative discovery and clear product explanations.
- Identified customer requirements, answered product and process questions, resolved objections and account issues, and coordinated escalations when technical or operational support was needed.
- Translated financing, product, and transaction information into clear recommendations and next steps that helped move customers toward purchase decisions.
- Maintained accurate CRM and case documentation while balancing customer experience, compliance-sensitive information, service targets, and high transaction volume.

Sales Representative | A Better Way Wholesale Autos | Naugatuck, CT

Sep 2017 - 2025

- Managed a high-volume, high-ticket sales pipeline from discovery through close, using consultative questioning to match customer needs with appropriate vehicle and financing options.
- Delivered product presentations, explained features and financing structures, handled objections, and coordinated with finance, service, and operations to remove barriers to purchase.
- Used CRM follow-up, relationship management, and structured outreach to develop repeat and referral business while maintaining an active pipeline.
- Consistently ranked among top performers while balancing revenue goals, customer satisfaction, documentation accuracy, and multi-step transaction requirements.

SELECTED TECHNICAL SOLUTION WORK

AI Receptionist & CRM Automation Solutions | Pre-sales demos, workflow design & implementation

- Designed demonstration environments connecting lead capture, CRM pipelines, appointment booking, SMS/voice follow-up, AI receptionist workflows, and automated nurture sequences to show prospects a complete revenue workflow.
- Translate prospect requirements into solution architecture, demo scenarios, workflow maps, integration needs, and implementation steps using APIs, webhooks, Twilio, GoHighLevel, and related automation tools.

VYBE Passenger App | Product discovery, technical coordination & solution communication

- Defined customer experience flows and technical requirements for a mobile product spanning React Native/Expo, Supabase, Spotify integration, voice/transcription, recommendation logic, subscriptions, and deployment.
- Converted product concepts and technical constraints into structured requirements, user flows, implementation priorities, and stakeholder-ready explanations that keep business and technical work aligned.

EDUCATION & PROFESSIONAL DEVELOPMENT

B.S. Cybersecurity & Information Assurance - Western Governors University (WGU) | In Progress • Software Engineering Training - TripleTen

Additional: HubSpot Customer Success & Service Hub • Salesforce Trailhead • SQL fundamentals • AWS / cloud fundamentals
