

EMMANUEL NANADOUM

Solutions Engineer | Sales Engineer | AI, CRM & Automation

Phoenix, AZ (Remote / Hybrid) | 602-810-1271 | nanadoum81@gmail.com | linkedin.com/in/emmanuel-nanadoum-7971b7a8

Portfolio & live demos: <https://emmanuel-nanadoum.vercel.app>

SUMMARY

Customer-facing technical and sales professional with 8+ years of consultative, high-ticket selling and 4+ years designing CRM, automation, web, and AI voice solutions. Leads discovery, turns business pain into technical requirements, builds proof-of-concept demos on the prospect's own business, and guides customers from evaluation through implementation. Portfolio: six live prospect demos and a deployed AI voice product.

SKILLS

Presales: Technical discovery, needs analysis, solution mapping, technical demos, proof of concept (POC), technical validation, objection handling, value articulation, scoping and proposals

Solution design: Solution architecture, workflow and integration diagrams, implementation planning, technical documentation, stakeholder communication, customer training and enablement

Technical: REST APIs, webhooks, SQL, Python, JavaScript, HTML/CSS, serverless functions (Vercel), Supabase (Postgres, auth), AWS fundamentals, Git/GitHub, troubleshooting

Platforms & AI: GoHighLevel, HubSpot, Salesforce, Twilio (voice/SMS), ElevenLabs (speech-to-text, text-to-speech), Google Gemini API, Web Speech API, AI voice agents, CRM automation, Jira

EXPERIENCE

Principal Consultant, CRM, AI Automation & Technical Solutions

2020 – Present

Blair Digital Studios | Remote

- Lead discovery and public-information revenue-leak audits for small practices (chiropractic, med spa), pinpoint where leads and revenue leak, and map goals to CRM, automation, web, and AI voice solutions.
- Build proof-of-concept demos on each prospect's own brand: six live prospect demos, including a revenue system with a live AI voice receptionist, test patient form, and 13-step patient journey.
- Design reusable solution architecture customized per client: a 12-stage CRM pipeline with tagged lead routing, missed-call text-back, 24-hour and 2-hour reminders, no-show recovery, and review requests.
- Present solution diagrams, scopes, and implementation plans with clear tradeoffs, then own handoff into configuration, testing, launch, and training using GoHighLevel, Twilio, REST APIs, and webhooks.

Sales Representative

Sep 2017 – 2025

A Better Way Wholesale Autos | Naugatuck, CT

- Managed a high-volume, high-ticket pipeline from discovery through close, matching needs to vehicle and financing options.
- Delivered product presentations, handled objections, and coordinated finance, service, and operations to close deals.
- Built repeat and referral business through CRM follow-up and structured outreach; consistently a top performer.
- Balanced revenue goals, customer satisfaction, and documentation accuracy across complex multi-step transactions.

PROJECTS

VYBE, AI passenger experience platform

vybe-app-blue.vercel.app

- Designed and deployed a voice concierge that keeps ride context (destination, trip length, passengers, mood): browser audio → ElevenLabs Scribe → context-aware response → ElevenLabs speech, on Vercel serverless functions.
- Supabase for auth, shared rides, and saved setups; provider keys kept server-side; Google Places/Routes recommendations integrated behind production credentials.

AI voice receptionist, browser voice agent

emmanuel-nanadoum.vercel.app/receptionist

- Built a two-way voice receptionist that runs in the browser: Web Speech API for listening and speaking, Google Gemini for replies, plus a demo mode that runs a sample practice's front desk.
- Guardrails in the system prompt (discloses it is AI; no prices, results, or medical advice; never claims a booking), per-IP rate limiting, and automatic fallback across Gemini models.

EDUCATION & DEVELOPMENT

B.S. Cybersecurity & Information Assurance, WGU (in progress) · Software Engineering Training, TripleTen

HubSpot Customer Success & Service Hub · Salesforce Trailhead · SQL Fundamentals · AWS / Cloud Fundamentals
